PROFILE

Passionate Full Stack Developer skilled in building scalable, high-performance web applications using the MERN stack (MongoDB, Express.js, React, and Node.js). Experienced in developing complex front-end features, integrating RESTful APIs, and optimizing backend performance. Adept at implementing state management solutions, enhancing user experience, and writing clean, maintainable code. Eager to contribute to a dynamic team, mentor peers, and drive impactful projects with innovative solutions.

WORK EXPERIENCE

FullStack Web Developer

Maitexa Technologies Pvt Ltd. Kozhikode, Kerala, India.   2021/06 - Present

- Implemented State Management Solutions: Utilized advanced state management libraries such as Redux and Redux-Toolkit to streamline application state and improve data handling.
- Improved Software Performance: Identified and resolved performance bottlenecks in React components and Node.js back-end, optimizing rendering processes and API calls, which led to significantly faster load times and a smoother user experience.
- Guided students in MERN Stack web development: Mentored students in mastering the MERN stack (MongoDB, Express Js, React Js, Node Js), preparing them for seamless transitions into professional careers and enhancing job readiness.
- Reusable Code Libraries: Created and maintained reusable components and utility libraries, reducing development time and ensuring code consistency across multiple projects.
- Scalable and Maintainable Code: Developed robust and scalable back-end services with Node.js and Express, and ensured maintainability through comprehensive documentation and best coding practices

Junior Software Developer

Futura Labs, Kozhikode, India   2020/09 - 2021-05

- Assisted in PHP Full-Stack Development: Contributed to the development of full-stack web applications using Laravel, collaborating with senior developers to ensure robust functionality and seamless user experiences.
- Optimized Application Performance: Assisted in identifying and resolving performance
